

Dec. 16/17

- 8 beds empty

- 2 people, a man on the front middle bunk and a woman I was unable to identify because she is in the other area, were exhibiting ~~this~~ <sup>these</sup> strange exaggerated rambo-nutious, persistent coughing fits - a trend that's continued unabated since my entry into the moncton Shelter system more than a week ago. Due to this, I was only able to call a sleep at

around 1 PM, ~~and~~ woken  
numerous times throughout the  
night, and finally was unable  
to get back to sleep at  
around 6:00 PM. All in all,  
this nightmarish "trend" has  
continued.

I asked her to confirm if what she was saying was actually the truth, as the odds of ~~one~~ one person and another Person ~~who know each other both dying 11 and 12 times in the same~~

~~week~~ ~~agreed~~ ~~independently~~ ~~that~~ ~~the~~ ~~odds~~ ~~of~~ ~~one~~ ~~person~~ ~~and~~ ~~another~~ ~~person~~ ~~who~~ ~~know~~ ~~each~~ ~~other~~ ~~both~~ ~~dying~~ ~~11~~ ~~and~~ ~~12~~ ~~times~~ ~~in~~ ~~the~~ ~~same~~ ~~week~~

friend - the man that sh with - had both, each week, died 11 and 12

~~I am not a statistician~~ ~~acceptably~~ ~~great~~ ~~at~~ ~~math~~

but that seems to be virtually impossible. Before they left, I was able to get their names: Tasha and "The Irishman".

The woman's name was Tasha, the ~~man~~ chose to go by the nickname

At around the time of 3:00pm,  
~~\_\_\_\_\_~~ while sitting ~~\_\_\_\_\_~~  
~~\_\_\_\_\_~~ in one of the chairs facing  
the office at ~~\_\_\_\_\_~~ "The Bridge to  
Home", one of the two open warming  
shelters offered in Moncton, a man and  
a woman, ~~\_\_\_\_\_~~  
~~\_\_\_\_\_~~ sitting beside me while  
me and the man/woman in mild conversation,  
~~\_\_\_\_\_~~ stopped and interjected  
in our conversation, saying something that  
I believe to be virtually impossible: that  
her and the man she was standing with  
had died 11 and 12 hours in one week,  
~~\_\_\_\_\_~~ her and him, respectively.

~~\_\_\_\_\_~~

Dec. 18/23 Dec. 18th  
3:30 p.m. 3:30 pm

The person occupying the 5th  
bed up ~~front~~ from the kitchen  
in the center row is, again, exhibiting  
this strange excessive, exaggerated,  
rambunctious coughing ~~the~~ behaviour  
that has become an every night  
occurrence since I have ~~attired~~ ~~stated~~  
utilizing the Macton shelter system.  
There is always somebody ~~necessitating~~ it  
seems. ~~The street~~ ~~they either~~

Again, it would be ~~to~~ crazy to complain  
about coughing, & throat clearing, nose  
blowing and hawking at a homeless shelter,  
but this is beyond anything that would  
be considered normal: it is <sup>highly</sup> exaggerated.  
The result is severe sleep deprivation. It is  
similar to going up to a person and nudging  
while they are trying to sleep. ~~For last night,~~  
~~the~~ ~~the~~ 10:05 pm going to have to

Scrap this observation, the person seems to be legitimately sick. When I approached him, he got very angry and defensive which is enough for me ~~to not believe his~~ behavior is more likely ~~to be~~.

~~(He tried to attack me)~~ nothing out of the ordinary. Last night, on the other hand, the coughing sounded so exaggerated that it almost had a comical, sarcastic tone. ~~the people~~ This went on for the entire night, and I barely got any sleep. Throughout the day, due to these extreme ~~forms of coughing~~ exaggerated forms of coughing, throat clearing and hoarseness I feel so exhausted that I'm on the edge of collapse.

10:20 PM: ~~the~~ the person originally noted ~~that~~ on the 5th bed in the center from the kitchen just ~~that~~ got very threatening with me and said that I was conspiracizing that he was a COP. I never that this or anything about

At around the time of 1:15pm, while sitting on the ~~set~~ center chair in the common room ~~&~~ the chairs directly facing the ~~front~~ front office - a young man wearing a black L.A. ~~hat~~ hat with blue eyes and a gaze with blue sketches shoes came and sat beside me while I was trying to sleep and began exhibiting this strange exaggerated coughing pattern that I've been noting ~~of~~ ~~the~~ ~~past few days~~. Of course, it would be ridiculous to be tracking such behaviour in a homeless shelter.

People tend to cough ~~&~~ more than what would be considered normal in these types of environments as ~~the~~ <sup>they</sup> typically smoke cigarettes and drink ~~in high concentration~~ <sup>in high concentration relative to the rest of the population</sup> ~~more frequently~~. But, again, this coughing is highly exaggerated ~~and~~ ~~mean~~ which ~~also~~ by itself would also ~~mean~~ mean nothing unusual, but when this is coupled with the fact that it is sustained, and happens ~~every night~~ and every night, leaving one in a state of severe sleep deprivation, it becomes a big problem.

I've never experienced this before, and I've been homeless for more than 3 years, having also spent another 8 months living in shelters in Alberta in 2018. Why, all of a sudden, am I struggling so hard to sleep in the Macton shelter system due to such an exaggerated, sustained coughing/nose blowing and hoarse ~~behavior~~ phenomenon from multiple different people, every single night and even

now, during the day, every time I'm attempting to sleep? Regardless because I feel I have no where else to turn—I have no ID and thus am unable to travel out of the

province—I am ~~not~~ going to continue journeying ~~the stage~~ see this conspicuous behaviour

So I can hopefully ~~figure out~~ if there is something else more noticeable ~~take place~~ going on, and then notify the right authority. By myself of course I can't do anything but if I can convince somebody with ~~the~~ the ~~state~~ enough resources and know-how maybe they can use my reports as the impetus for a formal investigation.

11:00ish Pm, Dec. 15th

The man in the second bed up ~~from~~  
~~the center~~ Starting from the  
closest bed ~~to~~ to the kitchen in the  
center row is excessively coughing, in  
what could almost be considered an  
~~at~~ uncontrollable manner. Every thing  
was fine for about an hour, then suddenly  
he won't stop coughing.

The reason why I'm making this report  
is because there has been a spree of  
different people ~~at~~ coughing, blowing their  
noses, or sneezing in a manner that  
is far beyond normal, but excessive.

Rambunctious and very exaggerated ~~and~~  
This same ~~behavior~~ ~~exhibited~~ was exhibited ~~by~~

~~at~~ last night by a man named Mark.  
It keeps everybody awake, and for me,  
this has caused me to lose so much sleep  
that I feel like I'm going to collapse  
during the day. I've been to many homeless  
Shelters and have never experienced this before.

~~Mark~~

~~Mark~~

Mark can be described

as a short man with a large beer belly, a middle aged, with a nice smile and a strong hair line. ~~My~~ ~~I~~ ~~can~~ These

strange ~~burst~~ and persistent, exaggerated bursts of coughing, ~~snorting~~ nose blowing and hiccups have been occurring since

I first ~~arrived~~ ~~at~~ ~~the~~ ~~hospital~~ arrived allived in Moncton almost 1 week ago - at both Harvest House and "The Hub"—but I'm starting this report for the first time today ~~and~~

~~that's~~ because last night Mark's coughing fits woke me up 3 times in a matter of 1 hour in the middle of the night, and this was on top of me getting to bed very late as well (due to his exaggerative coughing and nose blowing).

Now it could be absolutely insane to be making reports about this behaviour in a homeless shelter, but Mark's story about himself doesn't ~~seem~~ seem to add up. He says many things about himself that just don't seem to be true. ~~Something~~ ~~about~~ ~~him~~ just doesn't add up. I've even caught him changing his story about himself.

11:00ish Pm, Dec. 15th

The man in the second bed up ~~from~~  
~~the center~~ Starting from the  
closest bed ~~to~~ to the kitchen in the  
center row is excessively coughing, in  
what could almost be considered an  
~~at~~ uncontrollable manner. Every thing  
was fine for about an hour, then suddenly  
he won't stop coughing.

The reason why I'm making this report  
is because there has been a spree of  
different people ~~at~~ coughing, blowing their  
noses, or howling in a manner that  
is far beyond normal, but excessive  
rambunctious and very exaggerated ~~and~~
